IWEX 2022

The waste management exhibition is a prominent place to advance the goals of waste management and sustainable recycling in Iran and the Middle East.

The exhibition of waste management displays the latest innovations and technologies and presents the best solutions for the operation of returning materials to the cycle of use and opens the way for new business opportunities.

It also plays an important role in helping city authorities, and large industrial companies meet their landfill and ambitious recycling goals. The waste management exhibition is designed to cover the services and management of urban solid waste and find solutions to address the significant increase in waste production per capita and use new recycling methods to maintain a sustainable environment.

The waste management exhibition is held with the aim of supporting the challenges of immediate waste disposal in the region and efforts for sustainable development and environmental protection.
